

Tachyon: A Quantum Healing experience

Tachyon was never my plan. As a matter of fact, when I was told by my guides, I had to buy land to bring Tachyon to northern New England, I said no. Actually, I said "No, I don't think so. I am all set. You have the wrong person."

I was 68 years old, getting ready to retire in less than 2 years from my hospital lab job and had bought my condo to grow old in 2 years previous. There was also my retirement business of Memorial Bookmarks to grow. In my mind, I was all set.

Funny thing is when your constant prayer for years is "I am truly grateful only my highest good comes to me." your guides will basically harass you until you listen. They interrupt your sleep and your thoughts until you give in.

The previous year, articles about Tachyon kept showing up. When I called to experience it, no one was open due to the virus. So, I went on with my life. I became the coordinator for a spiritual organization in NH. Several months later is when I woke up being told I was to buy land.

At this point, a Tachyon Chamber had reopened on the border of Massachusetts and New York. So I went to experience Tachyon. I slept through the entire session. It took about an hour of grounding after the session to be able to drive. Half way home through Vermont, I realized something had shifted. I didn't know what but I felt really good. That was all so I really wasn't impressed.

However, upstairs had other plans. After bugging me more, I was asked just to call to find out what it would take to buy a Tachyon Chamber, 'just in case I changed my mind'. The energy of the first company that I pulled up online did not resonate. It actually felt very gray to me. I told my guides I couldn't work with this energy and they agreed and sent me to a second website.

When I opened this site, TachyonChamber.com, I could feel the warmth and love coming off the screen. This made me feel really good. As I read about how their version of Tachyon came to be and that they had added the frequency of Source Love to everything they do, I knew this was where I needed to be.

Next thing I know, I am on the phone with Paris from TachyonChamber.com. He informs me that the Tachyon energy has gone through a major upgrade and the chambers had some added features. Before he would speak further with me, I needed to experience the new chamber and one was located in Amherst, MA about 2 hours from me in Exeter, NH.

So, I go and spend an hour in the Tachyon chamber in Amherst and got a flat tire within 15 minutes of leaving to come home. Normally, this would have put me into fear and unfortunately, in the past and I went into fear, I wasn't a nice person. However, this time that didn't happen. I handled the situation very calmly. Weeks later, in telling the story to a friend, she brought to my attention that I handled the situation differently than I would have in the past. All I could think was because the Tachyon had balanced my emotions, I stayed out of fear and trusted it would work out.

Now my guides had gotten my attention, so I asked some friends to go and experience Tachyon and give me their feedback. Everyone came back with a different experience, all of them felt really good. I also went for another session.

Since I slept through all my sessions and I really don't feel the energy and did all this on trust, I was still skeptical. So, I asked a medical intuitive friend and a psychic friend to go in and ask what was done. I also dowsed for answers. We all received similar answers. My first session in New York was an emotional healing for trauma this lifetime. The first session in Amherst was an emotional healing for past life and generational trauma. That explained the calmness of the flat tire situation. When asking about the third session, I was asked how my knee was. I bent my left knee and there was no pain. (I have gravel in it from an accident and it acted like sandpaper and took out the meniscus.) It is now 3 years since that healing and still the pain is GONE.

At this point, I am looking at the money side of this venture and am really unhappy about it. I told the universe that they had one week to send me a clear concise message that I really needed to do this and they would provide everything I needed. Four days later, I got my answer.

A friend called saying she had 2 sessions in the Tachyon Chamber in Amherst. This woman had been in a car accident 5 years previous and went through 4 surgeries to repair her hip, which got worse with each surgery. Up until Tachyon, she lived with 8-10 on the pain scale 80% of the time. After just 2 sessions, she was at a 6-7 on the pain scale, 50% of the time. It was her comment, "I am doing things with my children that I haven't done in years," that sealed the deal for me.

Once I made the decision to bring Tachyon into northern New England, my guides took over. They found the perfect new home and location for my Tachyon chamber in Wakefield, NH. From the time my bid on the property was accepted to having the interior modified and painted and moving in, was less than 6 weeks. An electrician, plumber, plow guy all appeared when needed. Being in my late sixties, single and on a fixed budget, my guides have been absolutely incredible in providing everything I needed.

In looking back, I realized that I really did not fully understand what Tachyon really was and how it could really help people. I am still learning about it. As people come to the chamber, their experiences have shown a full array of benefits. People have claimed that pain they lived with for years is gone, feeling more grounded and stable, more physical stamina, less stressed and anxious and energetically shifting. We have had healing practitioners use Tachyonized items which have enhanced the healing for their clients. People have also used the Tachyon field of consciousness to manifest their dreams. It is recommended that people do 3 sessions and then notice any obvious and/or subtle changes in their lives.

What is Tachyon? Tachyon is a field of consciousness made up of subatomic particles that travel faster than light. Since Tachyons come from the cosmos, they include all frequencies needed for the body to heal. Tachyon's job is to balance and harmonize imbalanced energies by working directly with your DNA to repair and upgrade your body's template as well as neutralize harmful EMFs.

How does Tachyon work? The process involves Tachyon particles being drawn to an imbalanced atom. These particles work to restore balance to the atom until it reaches a state of Zero Point energy, achieving perfect equilibrium. Once stabilized at Zero Point, the atom remains permanently healed and locked in place. The Tachyon particles then proceed to balance surrounding atoms in a similar manner.

Whether you visit a Tachyon chamber or work with Tachyonized items, you will reap benefits. Personally, I always wear a Tachyonized necklace to build a balanced field around me. I tend to be scattered, so carrying a power disc in my pocket to keeps me balanced and focused. People who are sensitive to the Electromagnetic frequencies (EMFs) have found these frequencies are neutralized and no longer affect them. I have Tachyonized items on my desk, by my television, in my cell phone case and on my circuit breaker box to neutralize the harmful effects of EMFs.

To learn more about Tachyon, you can visit my website, DancingHeart.us, or the websites of my mentors, TachyonChamber.com and TachyonLiving.com.

Harlyene Goss has learned and used many holistic modalities over the last 25 years. She opened Dancing Heart Healing in July of 2022 where a full-size Tachyon Chamber is located in Wakefield, NH. She also takes a portable chamber to wellness centers in NH and ME.
